ALEXIS FRIES, PRESIDENT AND CEO:

"I am satisfied with Pöyry's improving performance during the reporting period. Our increased focus on sales is bearing fruit with several important projects secured during the quarter. We continued to sharpen project management processes and increase internal efficiency.

Pöyry's comparable net sales, excluding the business that was divested in Finland in June 2014, increased during the reporting period to EUR 430.8 (416.1) million. The figure increased in the Energy and Industry Business Groups and remained stable in the Management Consulting Business Group and in the Regional Operations.

Consolidated operating profit increased to EUR 3.9 (-10.9) million. The figure improved in all Business Lines, especially in the Regional Operations and in the Industry Business Group. In the reporting period, operating profit was impacted by one-time items totalling EUR -3 million, which were mainly recorded under the Regional Operations. As earlier reported, these include project losses recognised on a project originating from the former Urban Business Group, as well as expenses related to on-going arbitration proceedings in Brazil. The figure also includes costs associated with the CEO succession announced in August 2015.

Operating profit last year was burdened by one-time items totalling EUR -11 million and a write-off of the receivables from Venezuela amounting to EUR -14 million. The write-off and most one-time items were recorded in the Regional Operations and related to project losses originating from the former Urban Business Group. In addition, operating profit included a gain of EUR 19 million from the divestment in Finland.

The Group's order prospects remained solid. The comparable order intake increased year-on-year and several important projects were secured during the period. The figure improved clearly in the Industry Business Group, where order intake was strong especially in the pulp and paper sector. It also increased in the Energy Business Group, mainly due to the good performance in Asia and Middle East, as well as in the Management Consulting Business Group especially due to new projects in the energy sector. Order intake remained stable in the Regional Operations, where it stayed on the previous year's level in Northern Europe but decreased in other regions.

Pöyry's order stock increased year-on-year to EUR 487.8 (475.3) million. It increased in the Management Consulting Business Group and particularly in the Industry Business Group, demonstrating the improving order intake since 2014. The figure remained stable in the Energy Business Group and in the Regional Operations.

The Group's unallocated costs developed in line with expectations, as we continued to streamline our cost structures in the global support functions."

MARKET REVIEW

Uneven economic developments prevailed during the reporting period. Growth in the U.S. remained positive, fuelled by increasing domestic demand. Low commodity prices, together with persistently low inflation supported consumer spending. A steadily increasing employment rate improved consumer confidence. Excluding Germany growth in the Eurozone remained weak. Massive quantitative easing actions by the European Central Bank did not have the expected positive impact on the economy, and the Euro remained strong despite of high liquidity and low interest rates. Continued sanctions on Russia and slowing growth in China negatively impacted the European export sector. Persistently high unemployment in Europe weakened domestic demand and slowed down economic growth.

Low energy prices and prolonged regulatory uncertainties weakened demand for energy related services in Europe. Continued demand for energy in Asia impacted favourably investment decisions in the sector. Investments in the Middle East, in Saudi Arabia and the United Arab Emirates remained solid, supporting the demand for related services.

The demand for Industry related services developed positively in several of Pöyry's key domestic markets. The growing demand for packaging materials encouraged investments into new greenfield pulp production and into conversion projects from paper grades to board and packaging materials. The further weakening of the Brazilian economy, together with the current political uncertainties, negatively impacted investments. Globally low commodity prices, especially for iron ore and other minerals as well as oil and gas, continued to burden the prospects in these segments in all regions.

High levels of sovereign debt, the generally weak financial standing of the public sector and related austerity measures in many of Pöyry's domestic markets constrained the demand for infrastructure design and project management services. This development was partially offset by the public sector, where some infrastructure investments were prioritized in order to stimulate economic growth.

Demand for Pöyry's management consulting services remained stable. Increased margin pressure in many of our clients' industries is leading to opportunities for Pöyry's advisory and operational excellence services in particular. Increased activity on the transaction front offered interesting mandates for Pöyry's investment banking services.

Notes:

(i) Reporting is based on the organisational structure announced in February 2014 and further streamlined in August 2014. At the beginning of 2015, minor organisational alignments were executed between the Regional Operations and the Energy Business Group. The figures for the comparison year have been adjusted accordingly.

(ii) Following the divestment in Finland of significant parts of Pöyry's real estate design and consulting business, as well as its construction management business, the reported figures of Pöyry PLC and the Regional Operations in particular, have been impacted as of 2 June 2014.

(iii) Employee figures are reported in full time equivalents (FTE).

(iv) Figures in brackets refer to the corresponding year-on-year figures.

(v) Figures have been rounded off, which may lead to minor discrepancies upon addition or subtraction.

ORDER STOCK

The Group's order stock increased year-on-year to EUR 487.8 (475.3) million. Order stock increased in the Management Consulting Business Group and particularly in the Industry Business Group. Order stock remained stable in the Energy Business Group and in the Regional Operations.

The authorisation shall be in force until the next AGM.

At its assembly meeting immediately following the AGM, the Board of Directors elected Henrik Ehrnrooth as Chairman and Heikki Lehtonen as Vice Chairman. Heikki Lehtonen (Chairman), Georg Ehrnrooth, Teuvo Salminen and Karen de Segundo were elected as members of the Audit Committee. Pekka Ala-Pietilä (Chairman), Henrik Ehrnrooth, Heikki Lehtonen and Michael Obermayer were elected as members of the Nomination and Compensation Committee. In accordance with the authorisation by the AGM the Board decided to pay an additional fee of EUR 15,000 per annum to the foreign residents of the Board of Directors and an additional fee of EUR 5,000 per annum to the foreign residents of the committees of the Board of Directors.

PricewaterhouseCoopers Oy continues as Pöyry PLC's auditors based on the resolution made in the AGM on 8 March 2012. PricewaterhouseCoopers Oy has appointed Merja Lindh, Authorised Public Accountant, as the auditor in charge.

The decisions made by the AGM of Pöyry PLC on 12 March 2015 are available in full on the company’s website at www.poyry.com.

Authorisations
In the AGM on 12 March 2015, the Board of Directors was authorised to decide on the acquisition of up to 5,900,000 own shares of the company in one or more tranches by using distributable funds. The shares may be acquired either through public trading, in which case the shares would be acquired in another proportion than that of the current shareholders, or by public offer at market prices at the time of purchase. The Board of Directors is authorised to resolve on all other terms and conditions regarding the acquisition of own shares. The authorisation shall be in force for 18 months from the decision of the AGM. The authorisation granted by the previous AGM regarding acquisition of the company's own shares expired simultaneously.

The Board of Directors was also authorised to decide on the issuance of new shares and special rights entitling to shares, as well as to convey the company's own shares held by the company in one or more tranches. The share issue can be carried out as a share issue against payment or without consideration on terms to be determined by the Board of Directors and in relation to a share issue against payment at a price to be determined by the Board of Directors. A maximum of 11,800,000 new shares can be issued. A maximum of 5,900,000 own shares held by the company can be conveyed. The authorisation comprises a right to deviate from the shareholders' pre-emptive subscription right, as well as a right for the Board of Directors to resolve on all other terms and conditions regarding the issuance or conveyance of shares and special rights entitling to shares. Furthermore, the authorisation includes the right to decide on a share issue without consideration to the Company itself so that the amount of own shares held by the Company after the share issue is a maximum of one tenth (1/10) of all shares in the Company. The authorisation shall be in force for 18 months from the decision of the AGM. The authorisation granted by the previous AGM regarding issuing shares expired simultaneously.

The decisions made by the AGM of Pöyry PLC on 12 March 2015 relating to the authorisations of the Board of Directors are available in full on the company’s website at www.poyry.com.

At the end of the reporting period, a total of 13.86 per cent of the shares were owned by nominee-registered shareholders. Total ownership outside Finland, including Corbis, together with nominee-registered shareholders represented 48.98 per cent of the total shares.

EVENTS AFTER THE REPORTING PERIOD

There were no significant events after the reporting period.

PÖYRY'S ORGANISATIONAL STRUCTURE

Pöyry's organisational structure is based on the Management Consulting Business Line, Global Competence Business Lines (Energy and Industry) and the Regional Operations Business Lines. They are supported by the Global Sales and Project Management Function and the Global Support Functions.

The organisational set up serves clients both globally and locally in key domestic markets. The Global Competence Lines enable the business to build on global leadership positions established in the industrial and energy sectors. Pöyry is continuing to develop its large projects competence capabilities and its share in related orders are expected to increase.

The Regional Operations provide the business with a focused platform to deliver a large number of small to medium-sized domestic client projects across the full breadth of Pöyry's sectors. Comprehensive strategic advisory services are offered under the Management Consulting Business Line.

In addition, Pöyry implemented structural and administrative process improvements during 2013-2014. They have led to advancements in terms of sales focus, project management, as well as capacity management, and these positive trends are expected to continue.

SIGNIFICANT RISKS AND BUSINESS UNCERTAINTIES

Economic and political uncertainties continue and the risk of recession persists, particularly in the European market. This can impact on clients' decision making and lead to delays. These circumstances may adversely influence Pöyry's clients' ability to arrange project financing and more generally, slow down overall business activity and hence impact Pöyry's net sales and profitability.

Pöyry focuses equally on small, mid-size and large projects. Large projects, which also include Engineering, Procurement and Construction (EPC) projects, may require thorough and lengthy development work and therefore contain uncertainties related to financing, implementation concepts and the exact timing of project start-up, all of which are beyond Pöyry's control. During the project execution phase, further risks may emerge. The company has stringent risk management processes in place by which such risks are identified and mitigated at the earliest possible stage.

Among the on-going projects, there are some facing particular challenges and risks in the context of their execution. In some of these projects, the respective subsidiary companies are involved in disputes and litigation where the outcome and timing of the resolutions are uncertain and could differ from the management's current assessment. The majority of these projects originate from the former Urban Business Group. There is a distinct management focus on resolving these issues and their evolution is regularly reviewed and assessed in line with the company's risk assessment processes.

Part of Pöyry's business comes from municipal and other public sector clients. The high level of indebtedness of various economies has led the EU and an increasing number of governments to decide on austerity and cost-reduction measures. This may have a negative effect on infrastructure investments and consequently could affect services provided by Pöyry.

Part of Pöyry's net sales originates from emerging and developing countries, some of which face political and economic challenges. There is a risk that corresponding payment of invoices may be delayed excessively or that the Pöyry Group may experience credit losses. To manage this risk, the company maintains systematic processes for the follow-up and active collection of receivables.

The most relevant risks related to Pöyry's business are presented in more detail on the company's website at www.poyry.com.

Project and other guarantees
Project guarantees are normal undertakings related to project business, for example bid bonds or performance guarantees.

Rent and lease obligations
In 2013 Pöyry PLC sold its Vantaa office real estate in Finland. In the transaction Pöyry PLC signed a long-term lease agreement of 15 years for the property. The rent of the lease-agreement is market-based. Pöyry PLC is entitled to extend the term of the lease by a maximum of 15 years. The lease agreement of Vantaa office real estate is the largest lease agreement of the group and comprises most of the group's rental and lease obligations.

Claims and litigation
Given the nature of Pöyry's operations, claims are made against Group companies from time to time based on various grounds, however, these claims seldom result in litigation or arbitration.

Litigations and arbitrations of material value

Sino-Forest Corporation related litigations
In 2011 three competing class proceedings of material value were commenced in Ontario, Canada against Pöyry's subsidiary companies along with other defendants concerning matters relating to Sino-Forest Corporation ("SFC"). Only one of these competing class proceedings was allowed to proceed by the Ontario court (the "Ontario Proceeding"), the others were stayed. The Ontario Proceeding only named one Pöyry subsidiary company as a defendant. A parallel proceeding was commenced in Quebec, Canada involving the same Pöyry subsidiary company (together with the Ontario Proceeding, the "Canadian SFC Litigation").

During the first reporting period of 2012, the Pöyry subsidiary company named as a defendant in the Ontario Proceeding concluded a settlement agreement with the plaintiffs concerning the Canadian SFC Litigation (the "Settlement Agreement"), which was subsequently approved by the Ontario and Quebec courts in the third and fourth reporting periods of 2012, respectively.

In the fourth reporting period of 2012, the Pöyry subsidiary company named as a defendant in the Ontario Proceeding was also added as a defendant to an existing class action previously commenced against SFC and others in the State of New York of the USA (the "US SFC Litigation"). The allegations pleaded are similar to those in the Canadian SFC Litigation. There have been no material developments in the US SFC Litigation since the above-referenced addition of the Pöyry subsidiary company as a defendant.

A 'Litigation Trust' was created by way of the SFC insolvency proceedings in December 2012 to pursue certain claims that SFC and/or its noteholders had at that time. Commencing in the last reporting period of 2013, proceedings in Ontario, Singapore and most recently Australia were issued by the Litigation Trust against, inter alia, certain of Pöyry's subsidiary companies that had provided consulting services to SFC. While Pöyry's legal advisors in Canada, Singapore and Australia are of the view that these proceedings are without merit, it is premature to assess the outcome of these proceedings.

Rigesa arbitration
In 2013 Pöyry Tecnologia Ltda. and Pöyry Soluções em Projectos Ltda., subsidiary companies of Pöyry, commenced arbitration proceedings against Rigesa Celulose, Papel e Embalagens Ltda. ("Rigesa") in Brazil regarding the payment of certain change orders and other claims in relation to project deliveries of the said subsidiary companies to Rigesa. Rigesa has since commenced counter proceedings against the said Pöyry subsidiary companies in relation to the same project. The two arbitration proceedings have been combined into one proceeding (together the "Rigesa arbitration"). While Pöyry is convinced on the justification for its claims against Rigesa and does not see merit in Rigesa's counterclaims, it is premature to assess the outcome of the Rigesa arbitration.

Metro Lima Line No 1 – Contraloria litigations
The Office of the Comptroller General of the Republic of Peru ("Contraloria") has commenced several proceedings, together with a material value, against the Consortium CESEL-PÖYRY ("Consortium") and some of the employees of the participating companies concerning certain aspects of the site supervision services provided by the Consortium to its public sector client, Autonomous Authority of the Electric Mass Transportation System of Lima – Callao ("AATE"). Pöyry Switzerland Ltd. is a party to the Consortium. The services of the Consortium ended in 2013 and have been approved by the client AATE. While Pöyry's legal advisors in Peru are of the view that these proceedings are without merit, it is premature to assess the outcome of these proceedings.

The risk related to the individual claims and litigations where Group companies are involved is, on balance, considered immaterial on the Group level, taking into consideration the value and basis of these claims and litigations, the contractual terms and conditions and expert opinions applicable to these claims and litigations, the extent of Pöyry's business operations and insurance cover of the Group companies. There are, however, always uncertainties related to the outcome of litigation and arbitration proceedings.

The Group hedges the project cash flows denominated in foreign currency by using foreign exchange derivative contracts. Exchange rate gains or losses arisen from these derivative contracts are recorded in sales and project expenses.

The fair value of the foreign exchange derivative contracts is specified by closing date fair values for the corresponding maturities of the agreements. Derivatives in hedge accounting are effective. The fair values of the interest rate swaps have been specified by the present values of the future cash flows which are based on the closing date's interest rates and other information, excluding the accrued interest and exchange rate difference. The fair values represent the prices which the Group should pay or receive if it terminated the derivative agreement, and the fair values are based on banks' confirmations as well as reports produced by the treasury management system. Derivative instruments have not been set off in the financial statements but all belong to master netting agreements agreed with external counterparties.

Level 1 fair values are measured using quoted prices in active markets at the balance sheet date for identical assets or liabilities. A market is regarded as active if quoted prices are easily and regularly available from e.g. an exchange, dealer, broker, industry group or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. Instruments in Level 1 consist mainly of DAX, FTSE and Dow Jones equity investments classified as trading securities or available for sale.

Level 2 fair values of financial instruments that are not traded in an active market (for example OTC-derivatives) are determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. To value financial instruments the following techniques can be used:
-Quoted market prices or dealer quotes for similar instruments
-Interest rate swaps: the present value of the estimated future cash flows based on observable yield curves
-Foreign exchange forward contracts: discounting back to present value based on forward rates at the balance sheet date
-Other financial instruments: for example discounted cash flow analysis

Level 3 fair values are measured using valuation techniques based on unquoted parameter inputs.

During the reporting period there were no transfers between levels 1, 2 and 3.

The fair value of the financial assets and liabilities measured at amortised cost equals their carrying amount, as the impact of discounting is not significant. The fair values are within level 2 of the fair value hierarchy. Fair value calculation rules of the derivatives are presented in note Derivative Instruments.

*) Cash and cash equivalents include current account balances which belong to a multi-currency notional cash pool operated by Pöyry PLC. For reporting purposes the account balances of this cash pool can be offset if the conditions of "IAS 32 Financial Instruments: Presentation" are met. The Group met these conditions and at 30 September 2015 EUR 26.5 (19.9) million of the cash balances and equivalent amount of the overdraft balances were offset.
