

**PÖYRY INSIGHT REPORT
FOCUS ON MALAYSIA AND INDONESIA**

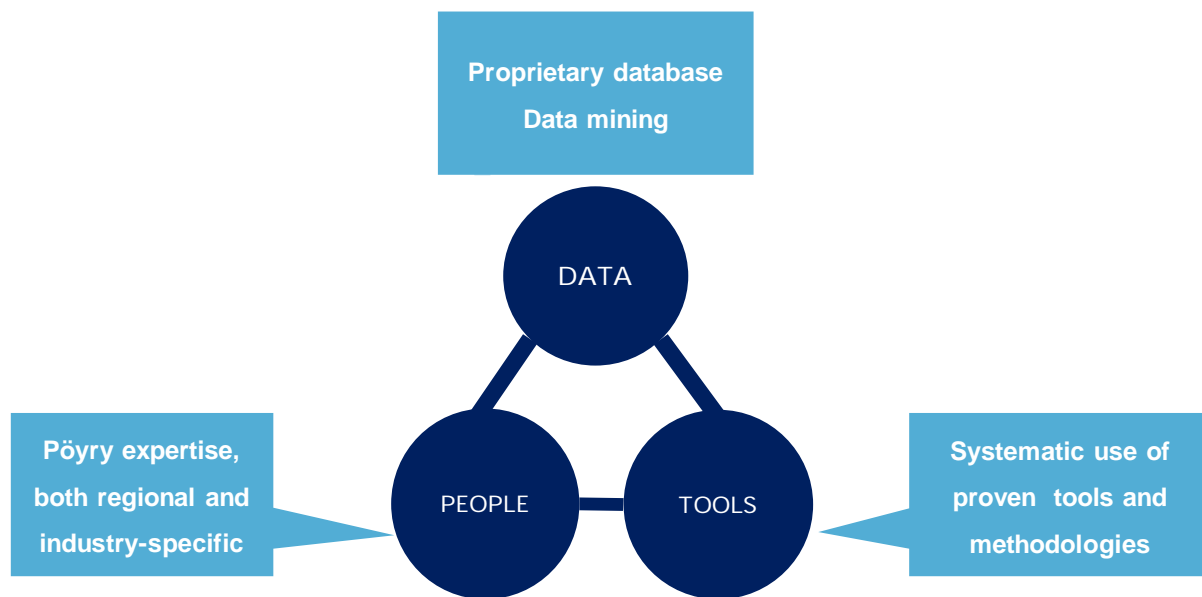

A photograph of a woodchip processing site. In the foreground, a large pile of woodchips is visible. In the background, a yellow excavator is working on a pile of woodchips. The sky is clear and blue. The text is overlaid on the image.

Hardwood Pulpwood and Woodchip Industry and Trade

INTRODUCTION

Hardwood Pulpwood and Woodchip Industry and Trade, published by Pöyry Management Consulting in China, gives an in-depth analysis of the hardwood pulpwood and woodchip availability in two of the most interesting countries in South-East Asia, Malaysia and Indonesia. The report is based on Pöyry's market and industry research and long-time experience in the forest industry sector within the region. The report gives a top level up-to-date view of industrial and trade dynamics supporting both operative and strategic decision making.

FEATURES

KEY STUDY QUESTIONS

The proposed study will develop an understanding of the supply and value chain of hardwood pulpwood and woodchips in Malaysia and Indonesia by seeking to address the following questions:

- What is the hardwood woodchip demand in the region?
- What is the hardwood woodchip supply in the region?
- What does the forestry look like in Indonesia and Malaysia?
- What is current industrial production in Malaysia and Indonesia?
- What are the real delivered wood costs?
- What are the current wood prices?
